

Future Technologies integrates state-of-the-art electronic solutions for your home and makes them easy for you to control and operate. ♦ We work with clients who are building new homes and clients who are remodeling existing homes. Our services include home automation and control, energy management, home theatre and media room design and installation, whole house video, whole house audio, and lighting and shade control. Many products are wireless so they can be easily installed in just one room and expanded throughout your home in the future, if desired. We work with our clients from the beginning design phase through the project and beyond to ensure they have the system they desire. Contact us today for a free consultation.
